March 10-14, 2015

## Connecticut's Young Scientists Will Test Their Mettle Next Month At Statewide Competition

HAMDEN, Conn., Feb 17, 2015 – Now in its 67<sup>th</sup> year in a row, volunteers with the Connecticut Science & Engineering Fair (CSEF) will provide a forum for hundreds of middle and high-school students to showcase their scientific prowess. From Greenwich to Groton, and everywhere in between, students have been working for months on their research and experiments.

These young scientists have participated in local science fairs during the current school year and have achieved at a high level to come to CSEF. This year, the kids will have a special treat, too: during finalist judging, Connecticut's newly appointed **Commissioner of Education, Dianna Wentzell**, will be at the Fair!

CSEF would like to invite members of the press to take a look at the great work Connecticut's students have been up to this year. The media is welcome to finalist judging on Thursday, March 12, from 9-1:15 and to the awards ceremony (six figures in prizes!) on Saturday, March 14 from 11-12:30. All events will be held at Quinnipiac University in Hamden.
