

# MAGICAL, BUT REAL SCIENCE!

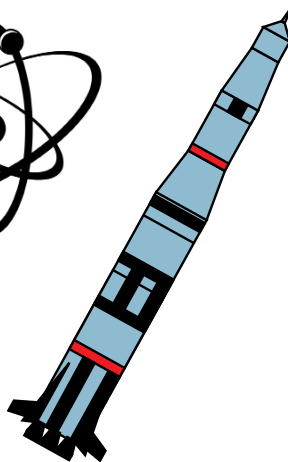

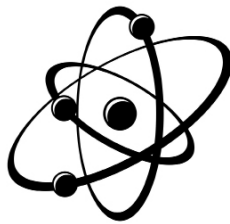

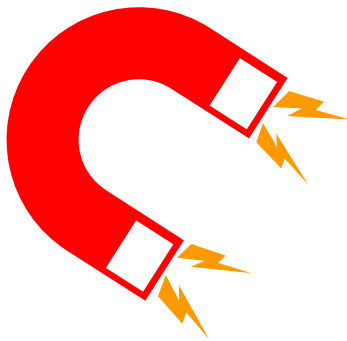

Physics Demonstrations

by Bob Erickson & Dave Perry

*See The Demonstrations*

*After You Set-Up Your Project!*

Demos "R" Us

Monday,  
During Set-Up Hours  
&  
Thursday  
During School Group Visits  
Exhibit Hall  
Quinnipiac University

In the physical world some things that happen often appear to be magical. Science provides the explanations-- there is no magic but a puzzle that keeps scientists busy understanding. Physics experiments in electricity, magnetism, heat, light, and mechanics experiments are amazing to see, but the fun is in understanding. Join Mr. Erickson and Dr. Perry and see the sometimes hard to believe science in action. This "minds-on" show will challenge you and perhaps give you ideas for experiments of your own!

Robert V. Erickson spent his career assisting students in experimental procedures in the physics laboratories of the University of Connecticut. Dr. Dave Perry, is a member of the UCONN Physics Department. From their many years of physics teaching experience, Bob and Dave have picked their favorite demonstrations to produce an exciting one hour science adventure for middle and high school audiences.

72<sup>nd</sup> Anniversary Year
